

CONTRACTS

Gainsborough

Gainsborough Beds

Gainsborough have been manufacturing beds for the hospitality sector for over 20 years. Our dedicated and skilled craftsmen use only quality springs and luxury fillings to ensure that the beds are not only robust enough to withstand the rigours of the day to day demands of the leisure industry, but also to give your guests the most comfortable and restful night's sleep.

Our range of models has been developed to cover all levels of accommodation from the smallest guesthouse or lodge through to the larger hotel chains.

As all of our beds are manufactured to order, should you have a bespoke requirement please just let us know the details and every attempt will be made to accommodate. We can also upholster the divan bases in customers own fabric to co-ordinate with your room decor. This gives a smart contemporary finish and eliminates the need for valances.

Safety is very important to us and all of our beds are tested on a regular basis and are fully compliant with BS7177 – the current fire retardant requirement for the contract industry.

Put in the simplest of terms – to offer your guests the best quality and comfort, choose a Gainsborough bed - we have the solution.

Epworth

The Bonnell high count open coil spring used in our Epworth mattress makes this our most cost effective model without compromising on quality.

Over 320 open coil springs in a 150 x 200cm size mattress complimented by four layers of upholstery fillings each side ensure your guest has a wonderfully comfortable night's sleep. Double heat treated spring sets and re-enforced edge wires are used for extra resilience. Hand tufted and with horizontal flag stitched handles and turning labels.

Finished in a classic black and white striped ticking, this mattress can be paired with either a sprung or solid top divan base.

Mattress is supplied as heavy gauge, 12.5 gauge Bonnell open coil unit, 5 convolutions, 6 gauge rod edge, 17.5 gauge helical wire. Four layers of upholstery each side including insulating layer, 250g soft white fibre, 1350g fire retardant felt and 7mm foam. Approximate mattress depth 20cm.

Available as a shallow sprung edge divan on black legs with glides and castors or as a deep sprung edge, firm edge or hard top base on castors. Sprung divans utilise 12.5 gauge Bonnell open coil units with two layers of upholstery fillings including insulating layer and 1350g fire retardant felt. Deep sprung divan height 39cm. Shallow sprung divan on legs height 34cm.

Laughton

Our most popular pocket sprung mattress offering over 1050 individual pocket springs in the 150 x 200cm size. These individual springs adjust to the contours of the body ensuring complete support.

Four layers of luxurious upholstery fillings each side ensure that the finished bed offers a comfortable and relaxing night's sleep. The mattress has vents, is hand tufted, flag stitched handles and turning labels. The Laughton is finished in an attractive light gold tick with a subtle diamond pattern.

For maximum comfort and longevity we would recommend pairing this mattress with a sprung divan base, but it can also be used with a solid topped or slatted base. Also has the option of clever side storage in the divan.

Mattress is supplied with heavy duty 1050 count (150cm x 200cm mattress) utilising 16.5 gauge, 18cm deep high tensile pocketed springs individually housed in strong fibretex pockets. Two flat strip edge supports clipped to unit. Upholstery layers include insulation layer, 25mm crib 5 foam, 1350g fire retardant felt and 7mm foam. Approximate mattress depth 23cm.

Available as a shallow sprung edge divan on black legs with glides and castors or as a deep sprung edge, firm edge or hard top base on castors. Sprung divans utilise 12.5 gauge Bonnell open coil units with two layers of upholstery fillings including insulating layer and 1350g fire retardant felt. Deep sprung divan height 39cm. Shallow sprung on legs height 34cm.

Somerby

Offering a beautifully comfortable high count pocket sprung mattress with over 1250 individual springs in 150 x 200cm size giving total support and relaxation.

The five layers of sumptuous fillings on each side ensure your most discerning guest has a truly luxurious sleeping experience, one they will want to return to! Once again we include vents, hand tufting and flag stitched handles. The Somerby is finished in our attractive light gold tick with a subtle diamond pattern.

As with the Laughton we would recommend pairing this mattress with a sprung divan base to give maximum comfort and longevity, but it can also be used with a solid top or slatted base.

Mattress is supplied with heavy duty 1250 count (150cm x 200cm mattress) utilising 16.5 gauge, 18cm deep high tensile pocketed springs individually housed in strong fibretex pockets. Two flat strip edge supports clipped to unit. Includes 5 layers of upholstery fillings each side including an insulation layer, 12mm crib 5 foam, 1250g cotton felt, 1350g fire retardant felt and 7mm foam. Approximate mattress depth 25cm.

Available as a shallow sprung edge divan on black legs with glides and castors or as a deep sprung edge, firm edge or hard top base on castors. Sprung divans utilise 12.5 gauge Bonnell open coil units with two layers of upholstery fillings including insulating layer and 1350g fire retardant felt. Deep sprung divan height 39cm. Shallow sprung divan on legs height 34cm.

Gainsborough Sofa Beds

Gainsborough understands that the sofa bed offers a great additional sleep space solution to your hotel, holiday or serviced accommodation. Our highly trained craftsmen have spent many years perfecting our designs and we have a long established reputation for quality, comfort and style.

Each item is hand crafted and individually tailored by experts with a keen eye for detail. With so many design choices one is bound to suit your style!

By using the most robust contract mechanisms available we ensure that our sofa beds withstand the rigours and strains of the hospitality industry. The mechanism features a twofold slatted base to support a spring interior mattress designed for regular use. All of our sofa bed mattresses have a length of 196cm for the taller guest.

Most of our models are available in four different sizes, chair bed, small, medium and large sofa bed, so we should have a size to fit your space. We are also specialists in the use of the client's own upholstery material. We can help with your selection of fabrics and work with a variety of suppliers offering beautiful velvets, robust linen looks and textured weaves through to fabulous faux suedes and leathers – all for severe contract use.

Our range also offers matching fixed sofas, chairs and footstools. All of our contract furniture is tested to comply with or exceed industry standards for safety and fire requirements.

Candice

Small	115 x 196	153	99	89
Chair	-	58	99	89

All sizes are in cm.

The middle section of the mechanism is supported by a vertical individual leg to help carry the user's weight.

Mechanisms explained

There are many mechanisms available on the market. However very few of these are suitable for the contract market. Gainsborough only use the heavy duty contract level mechanism shown here.

It is very important that the centre leg of any contract mechanism is not constructed from a "u" shaped section of steel. As most of the weight of the user is concentrated around the middle of the mechanism it is important that this section is supported by a vertical individual leg as shown above. Also this allows Gainsborough to use a 196cm long, 12cm deep mattress rather than the 183cm long, 10cm deep mattresses that many manufacturers use.

The use of inferior systems can result in failure and Gainsborough's mechanism is tested to BS EN 13759 for durability and stability. Choose the best, choose Gainsborough.
